How a Cricket Saved a Ship.

In Southey's "History of Brazil" he tells how Cabeza de Vaca was in a great ship going to South America with four hundred men and thirty horses; and after they had crossed the Equator, the ommander discovered that there were only three casks of water left. He gave orders to make the nearest land, and for three days they sailed for the coast. A poor, sick soldier who had left Cadiz with them brought a grillo, or ground cricket, with him, thinking its cheerful voice would amuse him on the long, dreary voyage. But, to his great disappointment the little insect was perfectly silent the whole way.

The fourth morning after the ship had changed her course, the cricket, who knew what she was about, set up her shrillest note. The soldier at once gave warning to the officers in charge of the vessel, and they soon saw high, jagged rocks just ahead of them. The watch had been careless, and the great ship in a few moments would have been dashed to pieces on the ledges, if this puny creature had not scented the land, and told them of their danger. Then they cruised sang for them every night, just as cheerily as if she had been in far off Spain, till they got to their destined port, the Isl-

This shows an appreciation of our efforts to benefit deaf-mutes in every way we can. The boy referred to is one of the many "wild" boys that entered school only a year ago; one, too, who often for their deaf children on precisely the would, but no one that knows me will taxed our patience, etc., to a severe tension. He (as well as the others) has become quiet ("tame" as the mutes call it), and obedient. In fact, a real good Children should be taught to obey, but their spirit should not be broken in order to gain obedience, as a child with a worthless scholar and citizen than a wayward one. Obedience should come of duty and love, rather than from excessive fear of punishment.

Mr. - feels more hopeful than he did a while back, when he said to us, who has gone so far in this direction as to and 20° at sunrise. We are not prepared tures. "Do you think you can ever do anything with him ?" We replied, "Yes; give time and we will make a good boy of him, if not a good scholar also."

It often happens that wild (not vicious or mean) children make the best scholars and citizens, as their wildness is frequently caused by a vigorous and healthy physical system and an independent mind, both of which are hard to bring down to the rules of school discipline while children who are sickly and what is called "too good" (?) often lack those essentials necessary for great attainments, perfect character and good citizens, and worse than the former class. Perhaps these two extreme cases are exceptions and not the rule.

However, it is very slow and tedious work to instruct and develop the minds and assist in the forming of the characters of deaf-mutes be they "wild" or "tame"; far more even than those of but who have never been to school.

Scrofula, or King's Evil, is a constitutional discusse, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venercal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

To the wheels chass of diseases originating in billacia of Brissmatic Countries.

We are enabled here to offer the community a semedy which, while it cures the above complaints with certainty, is still perfectly harmless in any quantity. Such a remedy is invaluable in district where these afflicting disorders prevail. This "Cure" expels the miasmatic poison of Fever And Ague from the system, and prevents the development of the disease, if taken on the first approach of its premonitory symptoms. It is not only the best remedy ever yet discovered for this class of complaints, but also the cheapest. The large quantity we supply for a dollar brings it within the reach of every body; and in bilious districts, where Fever And Ague prevails, every body should have it and use it freely both for cure and protection. A great superiority of this remedy over any other ever discovered for the speedy and certain eure of Intermittents is that it contains no Quinning or mineral, consequently it produces no quinism or other injurious effects whatever upon the constitution i Those cured by it are left as healthy as if they had never had the disease.

Fever and Ague is not alone the consequence of the miasmatic poison. A great variety of disorders arise from its irritation, among which are Neuralgia, Rheumatism, Gout, Headache, Blindness, Toothache, Earache, Catarrh, Asthma, Palpitation, Painful Affection of the Spleen, Hysterics, Pain in the Bowels, Colle, Paralysis and Devangement of the Stomach, all of which, when originating in this cause, put on the intermittent type, or become periodical. This "Cure" expels the poison from the blood, and consequently cures them all alike. It is an invaluable protection to immigrants and persons travelling or temporarily residing in the malarious districts. If taken occasionally or daily while exposed to the infection, that will be exerted from the system, and cannot accumulate in sufficient quantity to ripen into discuss Hence it is even more valuable for protection this remedy affords.
